Drones equipped with infrared cameras can be used to detect irregularities in insulation and pooling water. With a zoom camera drone, inspectors can visually identify problems without having to be physically there. This means greater efficiency for the inspector while providing better data to the client.durability

On 5 December 2011, an American Lockheed Martin RQ-170 Sentinel unmanned aerial vehicle was captured by Iranian forces near the city of Kashmar in northeastern Iran. The Iranian government announced that the UAV was brought down by its cyberwarfare unit which commandeered the aircraft and safely landed it, after initial reports from Western news sources disputedly claimed that it had been "shot down". The United States government initially denied the claims but later President Obama acknowledged

~~Iran | U.S. RQ-170 incident—Wikipedia~~

Iran has used drones to harass the US naval presence around the Persian Gulf, augment its influence in Syria and Iraq, and attack or threaten the critical infrastructure of US allies in the region. To neutralize the Iranian drone threat, the US should pursue a strategy based on raising the costs of further attacks, investing in counter-drone technologies, and extending the UN arms embargo.

~~How to Combat the Iranian Drone Threat~~

On June 20, 2019, Iran 's Islamic Revolutionary Guard Corps 's (IRGC) shot down a United States RQ-4A Global Hawk BAMS-D surveillance drone with a surface-to-air missile over the Strait of Hormuz. Iranian officials said that the drone violated their airspace, while U.S. officials responded that the drone was in international airspace.

~~2019 Iranian shoot-down of American drone—Wikipedia~~

Iran Facing years of sanctions and an obsolescent conventional air force, Iran develops and manufactures its own UAVs which are deployed in Syria and Iraq. Drones are perceived for the country as a tool to compensate for the weakness of conventional airpower and conferring new military capabilities.

~~Amazon.com: IR Drones~~

Iran uses its drones to fly over U.S. Navy ships in the Persian Gulf, and for a theoretical future war against Israel. Iran supplies drones to Hezbollah, the Lebanese paramilitary organization, which has been known to fly its Iranian UAVs into Israeli airspace.

~~Iran's Many Drones—Center for the Study of the Drone~~

Multispectral imaging camera sensors on agricultural drones allow the farmer to manage crops, soil, fertilizing and irrigation more effectively. There are huge benefits both to the farmer and to the wider environment by minimizing the use of sprays, fertilizers, wastage of water and at the same time increasing the yield from crops.

~~Multispectral Imaging Camera Drones in Farming Yield Big—~~

BEIRUT, LEBANON (10:40 A.M.) ▯ Iran has shot down another foreign drone that entered its airspace from neighboring Azerbaijan, amid the ongoing conflict between the latter and Armenia inside the disputed Karabakh region.
