Formative years can be called Early Childhood. Formative years are periods of early childhood between 0-8 years of a child ' s life. It is also a period of a rapid cognitive (intellectual) , social, emotional and physical development of a child. This development occurs based on the child ' s response and the interaction between genetics, environment and experience.

Formative evaluation is primarily diagnostic; it is about collecting qualitative data to identify and fix UX problems and their causes in the design. Summative evaluation is about collecting quantitative data for assessing a level of quality due to a design, especially for assessing improvement in the user experience due to formative evaluation.

~~Formative Evaluation – an overview | ScienceDirect Topics~~

The good news is that those folks whose formative experiences left them with questionable parenting or relationship skills can improve with help and support. Adults who were abused or exposed to abusive behaviour between their parents as children, where it appears to be affecting life through parenting skills or relationships, are advised to consider counselling, parenting courses, marital ...

~~Your Social Worker – Gary Drenfeld, MSW, RSW~~

The ecological model was selected to guide the formative research because it offered a concrete framework to account for the reciprocal interaction of behavior and environment.
