~~Gut Insight — probiotics and prebiotics~~

Prebiotics. A good way to explain prebiotics is by thinking of them as fertilisers in our gardens, to help feed and grow all our plants. By adding a prebiotic to our diet, we can similarly feed and help our gut bacteria grow strong to benefit our overall ecosystem. Many plant foods contain different types of prebiotics.

~~Prebiotics & Probiotics — Guts UK~~

Instead, prebiotics travel to our lower gastrointestinal tract where they're fermented by probiotic bacteria. In a nutshell, probiotics are microorganisms that are beneficial for our health, and prebiotics are what feed probiotics. Fruit, vegetables, cereals and other edible plants all have potential to provide prebiotics.

~~Gut Check: Prebiotics and Probiotics ... — Food Insight~~

Two parts of our diet that are uniquely able to affect the microbiome are probiotics and prebiotics. Probiotics are live microorganisms that offer a health benefit—for example, by helping to enhance or restore health to our gut microbiome. Many of the microorganisms that naturally live in our bodies are similar to microorganisms found in probiotic foods, drinks and dietary supplements.

~~Gut health in space: Personalized prebiotic and probiotic ...~~
, is a prebiotic that can be used as food for gut bacteria. Onions, garlic, artichokes, and legumes are also prebiotic sources. When a food source contains both prebiotics and probiotics, the...

~~Prebiotics vs. Probiotics: Can You Take Them Together?~~

Like prebiotics, you can take probiotics through both food and supplements. Probably the most common probiotic food is yogurt. Yogurt is made by fermenting milk with different bacteria, which are left in the final product. Other bacteria-fermented foods, such as sauerkraut, kombucha and kimchi, are also good sources of probiotics.
