Encyclopedia Smithsonian: Selected Sources of Information ...

Conus retifer, common name the netted cone, is a species of sea snail, a marine gastropod mollusk in the family Conidae, the cone snails and their allies.. Like all species within the genus Conus, these snails are predatory and venomous. They are capable of "stinging" humans, therefore live ones should be handled carefully or not at all.

B Salvat Editions Pacifique

Conus retifer - Wikipedia

Conus geographus, popularly called the geography cone or the geographer cone, is a species of predatory cone snail. It lives in reefs of the tropical Indo-Pacific, and hunts small fish. Although all cone snails hunt and kill prey using venom, the venom of this species is potent enough to kill humans. Specimens should be handled with extreme caution.

Conus geographus - Wikipedia

The British claimed Tahiti in 1767, the French a year later. Europeans questing for tropical commodities and missionaries questing for souls noticed islanders wearing the curious black gems.
